David focuses his practice on intellectual property litigation.

Prior to attending law school, David worked as a senior software engineer at Parametric Technology Corporation. David developed and managed software modules for Pro/Engineer®, an industry leading 3D computer-aided design software package used by mechanical engineers to create 3D computer models.

Following law school, David clerked for the Honorable Cory J. Ciklin of the Florida Fourth District Court of Appeal.

Experience

Won summary judgment on behalf of Big Ten Network in its defense of a patent infringement case centering on a mobile streaming application through which users can watch Big Ten Conference games on their mobile devices. In granting our motion, the court agreed that there was no literal infringement of the patent at issue and that the plaintiff was estopped from arguing infringement under the doctrine of equivalents. This result was affirmed by the U.S. Court of Appeals for the Federal Circuit.

Practice Areas

- Intellectual Property Litigation
- Trade Secrets & Unfair Competition
