John Ho, a member of Cozen O'Connor's **Labor & Employment** department, will be speaking at this event in New York. This CLE program will provide the nuts-and-bolts necessary for attendees to understand the at times confusing formulas that apply when calculating wage-related damages under the Fair Labor Standards Act and the New York Labor Law. The panel will discuss specific and complex examples that arise in practice, such as calculating hourly, overtime, and minimum wage rates; interest under state and federal laws; liquidated damages; statutory damages under the Wage Theft Prevention Act; tip credits and tip damages; spread-of-hours pay; and non-hourly wage rates (e.g., salaried and piece-rate employees). The program will also focus on special rules for the calculation of damages in the hospitality, domestic worker, and building services industries.
